(54) Title: METHOD AND SYSTEM FOR MARKETING A TREATMENT REGIMEN

(57) Abstract: A software program, for use on a computing device, is provided to a health care provider (HCP). The software program configures the computing device with means for inputting profile information regarding patients (210) and means for comparing the patient profile information against a database containing information regarding one or more drug studies performed on patients with similar medical histories and/or symptoms. The patient information is compared against the database (214), and, when appropriate, the healthcare provider is informed that the patient could benefit from the drugs in drug study (e.g. a particular dosage of the drug in the drug study) (220).

## \* Special categories of cited documents:

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
